DETAILED ACTION

1. This application has been reviewed. Original claims 1-42 are pending. The rejection cited stated below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-42 are rejected under 35 U.S.C. 102(e) as being anticipated by Schneider et al., U.S. Patent No. 6, 408,336.

As per claim 1, Schneider discloses a method for modifying group membership, comprising the steps of:

receiving a request to add a first entity to a first group (see fig. 9 and col. 23, lines 27-53);

accessing an indication of a first policy from a set of policies for changing static membership of said first group (see fig. 11 and col. 24, lines 32-54); and

adding said first entity to said first group as a static member based on said first policy (see col. 24, lines 32-54).

Art Unit: 2157

As per claim 2, Schneider discloses a method according to claim 1, wherein: said request is for said first entity (see col. 7, lines 32-49).

As per claim 3, Schneider discloses a method according to claim 1, wherein: said indication is stored in an attribute of an identity profile for said first group(see col. 7, lines 12-31).

As per claim 4, Schneider discloses a method according to claim 1, wherein: said set of policies includes an open policy, an open with filter policy, a controlled through workflow policy, and a closed policy (see col. 9, lines 32-52).

As per claims 5-10 Schneider discloses a method according to claim 4, wherein: said identity profile for said first group includes a filter attribute, said filter attribute stores a filter that is used with said open with filter policy to determine whether said first entity may be added to said first group (see fig. 3 and col. 9, lines 32-52).

As per As per claims 11-17 Schneider discloses a method according to claim 1, wherein: said indication is stored in an attribute of an identity profile for said first group; said identity profile for said first group includes an attribute that stores an indication of whether to send a message upon adding said first entity to said first group; and said identity profile for said first group includes an attribute that stores said message (see fig. 3 col. 9, lines 32-52 and 12, lines 28-39).

Art Unit: 2157

As per claims 18-42, the claims include features discussed above with respect to claims 1-17, thus claims 18-42 are rejected same rational as claims 1-17.
